

**TURBO UPG**  
SANITARY SILICONE

Sanitary Silicone Turbo UPG is a one-component, flexible sealant designed for sealing joints, as well as for protection against moisture. It contains a specially selected composition of components that prevent the appearance and development of bactericides and fungicides with an extended release time (UPG - UPPER PROTECTION GRADE). This new generation of fungicides ensures 10-year protection and cleanness of places exposed to fungi, mould, and bacteria. The product was tested for resistance to microbial growth and for fungal growth inhibition. Thanks to the improved formula, it cures at an accelerated rate and is resistant to water within 2 hours of application. This is the latest generation of fungicides that ensure long-term cleanliness of places especially susceptible to the effects of fungi such as bathtubs, sinks, and shower cabins; in addition, it is absolutely safe for the user. Despite this, the product is resistant to all detergents, high and low temperatures, as well as UV radiation.

#### BENEFITS

- ▶ 10 years mould and fungus protection guarantee
- ▶ Fast cure - water resistant after 2 hours
- ▶ Fast and easy sealing in places with high humidity
- ▶ Contains fungicides that are completely safe for the user
- ▶ Doesn't change its appearance and physical properties over many years
- ▶ Resistant to high temperature changes and UV radiation
- ▶ Very good adhesion to different surface
- ▶ Resistant to detergents

#### TECHNICAL PARAMETERS

Cross-linking system	acetate
Application temperature	+5°C - +40°C
Skin formation time	5 - 20 min
Curing rate	2-3 mm
Working time	5-10 min
Temperature resistance	-40 °C - +100 °C

All given parameters are based on laboratory tests compliant with internal manufacturer's standards and strongly depend on product hardening conditions (c.a., ambient, surface temperature, quality of used equipment and skills of person applying the product).

SANITARY SILICONE

#### APPLICATIONS

- ▶ sealing baths, hand basins, showers, sinks and other sanitary facilities, water supply equipment
- ▶ perfect for rooms with high humidity
- ▶ sealing of ceramic tiles
- ▶ sealing connections and dilatation gaps
- ▶ small home repairs

#### SURFACES

Stainless steel

Ceramic tile

Brick

Concrete

Glass

Wood

Hard PVC

Polystyrene

Polycarbonate

#### COLOR

White

Transparent
